**ABSTRAK**

Seiring bertambahnya tahun, pengangguran semakin banyak prosentasinya. Hal tersebut di karenakan banyak warga yang putus sekolah akibat masalah perekonominya, yang menyebabkan sulit untuk mencari pekerjaan, karena lulusan SD dan SMP kini sudah jarang sekali di butuhkan, lulusan SMA saja banyak yang berebut mencari pekerjaan di pabrik di karenakan kuota yang sangat minim. Pengangguran di Indonesia setiap tahunnya semakin bertambah apalagi dengan adanya virus covid-19 yang menyebabkan banyak karyawan swasta yang di PHK. Di era globalisasi yang modern ini perkembangan teknologi sangatlah pesat terbukti dengan adanya toko online, transportasi online dan banyak juga lowongan pekerjaan online, namun lowongan online yang banyak di media sosial tidaklah efektif, mungkin ada juga yang hanya menerima lulusan S1,S2 , ada juga yang membutuhkan pesyaratan yang cukup banyak hingga berbelit-belit, dan yang sering kita temua bahwa lowongan pekerjaan online sering kali HOAX (palsu). Oleh karena itu kami membuat aplikasi DaripadaNgganggur.com , aplikasi pencari kerja yang sangat efektif di era globalisasi ini, aman, dan tidak membutuhkan persyarat yang berbelot-belit. Peneliti berharap dengan terciptanya aplikasi DaripadaNgganggur.com ini pengangguran di Indonesia khususnya kota lamongan akan segera teratasi. Rancang bangun aplikasi DaripadaNgganggur.com ini di bangun dengan tahap analisis kebutuhan, pengumpulan data, perancangan aplikasi, pembuatan aplikasi, percobaan aplikasi, perbaikan aplikasi dan yang terakhir yaitu pengujian aplikasi kepada pengguna. Dalam proses perancangan prototype aplikasi DaripadaNgganggur.com menggunakan Website Blogger Dan menggunakan file Web 2 Apk Builder Pro. Aplikasi DaripadaNgganggur.com ini dapat melayani pemberi kerja (yang membutuhkan bantuan dalam pekerjaanya), publikasi lowongan, data dan persyarat pekerja yang menggunakan fitur google form dan informasi tentang diterima maupun tidaknya pekerja. Dari hasil data kuisisioner kepada 41 responden dengan 8 butir pertanyaan dengan nilai kriteria 1 – 5 nilai kepuasan respond terhadap aplikasi DaripadaNgganggur.com mencapai 89% dan masuk kategori Sangat Baik.

**PLATFORM OF INFORMATION PROVIDER OF FREEDOM  
VACANCIES FOR ANYONE AS AN EFFORT TO REDUCE THE  
AMOUNT OF UNEMPLOYMENT IN INDONESIA**

**ABSTRACT**

As the years go by, unemployment has increased in percentage. This is because many residents drop out of school due to economic problems, which make it difficult to find work, because elementary and junior high school graduates are now rarely needed, many high school graduates are scrambling to find work in factories because the quota is very minimal. Unemployment in Indonesia is increasing every year, especially with the covid-19 virus which causes many private employees to be laid off. In this modern era of globalization, the development of technology is very rapid, as evidenced by the existence of online shops, online transportation and many online job vacancies, but many online vacancies on social media are not effective, maybe some only accept S1, S2, and there are also those that require quite a lot of convoluted requirements, and what we often find is that online job vacancies are often HOAX (fake). Therefore, we created the DaripadaNganggur.com application, a job seeker application that is very effective in this era of globalization, safe, and does not require complicated conditions. Researchers hope that with the creation of the DaripadaNganggur.com application, unemployment in Indonesia, especially the city of Lamongan, will soon be resolved. The design of the DaripadaNganggur.com application is built with the needs analysis, data collection, application design, application development, application testing, application improvement and finally, application testing to users. In the process of designing an application prototype rather than idle. com using the Blogger Website and using the Web 2 Apk Builder Pro file. The DaripadaNganggur.com application can serve employers (who need assistance in their work), job publications, data and conditions for workers who use the google form feature and information about whether workers are accepted or not. From the results of questionnaire data to 41 respondents with 8 questions with a criterion value of 1 - 5, the value of respondent satisfaction with the DaripadaNganggur.com application reaches 89% and is in the Very Good category.

***Key words: application, job vacancies, unemployment***
